

## Report from Argentina

- ✓ We set up a working group of Women in the Academy (ANCEFN)
- ✓ As a first task we conducted a poll with the purpose of having a clearer panorama about the present perception of barriers, needs and a general overview of gender issues in the daily work

*The survey was first analyzed by a mathematician specialized in statistics. The next step is adding the sociological analysis.*

The results will be presented before authorities of Sci. & Tech official institutions (CONICET, Universities, etc.) as another tool for the generation of public policies that guarantee a satisfactory professional development of women in science

- ✓ We carried out our Academy's census update
